Good to Know

ALERT SERVICES AVAILABLE ONLINE

ICAPB2B users have access to a new feature: the option to request a company to be monitored directly from the online application and to be notified each time a change in the company has occurred.

The Alert Service is activated through the button "REQUEST ALERT", appearing on the report deliverable page of the Business Report, that you have requested. The Alerts that you will receive are related to the type of information contained in the respective business report. An automated system will monitor daily, over a period of one year, for changes that have occurred in the company you have requested. In the section "MY ACCOUNT" in the platform and/or via e-mail you will receive alerts with information only in the days that changes have occurred.

ACCORDION DISPLAY OF REPORTS

For easier and faster access to the information you require in a Business Report, we have introduced the "accordion display", which allows you to expand and collapse the desired section of the report thus minimizing the need for vertical scroll on the page.

NEW MODULE ON INSOLVENCY TRIALS

Information for insolvency trials, where the investigated company is respondent has now become part of the Standard and Comprehensive business reports. The module includes information on the petitioner, the court and the status of each trial.
